Feb. 7, 2019

RE: Cedar Lake Road construction project

Public meeting: Thursday, Feb. 21, 4 - 5 p.m. (Presentation at 4:15 p.m.)
St. Louis Park City Hall – Council Chambers (3rd floor)
5005 Minnetonka Blvd., St. Louis Park, MN 55416

Dear business or property owner:

Cedar Lake Road, between Kentucky Avenue and Quentin Avenue, is scheduled for rehabilitation during the 2019 construction season. This project includes pavement replacement, a new bicycle facility, new sidewalk, trail replacement, watermain replacement and roundabout installation at Cedar Lake Road / Zarthan Avenue. Sidewalk installation is also planned on Zarthan Avenue and Ridge Drive. A map showing the location for the improvements is attached. Construction is planned to occur between April and November 2019.

Two public meetings were held in summer/fall 2018. Attendees provided input on the project scope and configuration. The purpose of the next meeting is to provide information regarding the project plans, schedule, detour routes for vehicles (including busses) and construction details. The design team and city staff will be in attendance to answer general questions regarding the project, as well as specific questions regarding how the project will affect individual properties.

The public meeting will be tailored to business specific needs and issues. This meeting will also provide more information about the street rehabilitation project and will allow businesses to communicate important issues which should be considered during construction of the project. Throughout the public participation process, city staff is committed to keeping businesses informed, listening to and acknowledging your concerns and providing feedback on how input influenced the project outcome.

If you have any questions or are unable to attend the meeting and would like to make arrangements to discuss this project at another time, call me at 952.924.2552 or email jshamla@stlouispark.org. We look forward to working with you and your business.

Sincerely,

Joseph Shamla, P.E.
Sr. Engineering Project Manager
