DESCRIPTION OF WORK: City Project No. 5318-5006

In general, work consists of the removal of existing programmable logic controllers (PLCs), operator interface terminals (OITs), radios, and the supply and installation of new PLCs, OITs, Ethernet switches, and other appurtenances for existing control panels located at three (3) well houses, seven (7) water treatment plants, one (1) elevated water tank, four (4) storm water lift stations, and sixteen (16) sanitary lift stations. Complete control panel replacement for one (1) existing storm water lift station and seven (7) existing sanitary lift stations will be performed. This project will utilize a combination of cellular and fiber communications to replace the radio communication system. This also includes providing new supervisory control and data acquisition (SCADA) servers and software, and implementing several system monitoring redundancies.

COMPLETION OF WORK: All work under the Contract must be substantially completed by the completion date specified in the project specifications.
