2019 Pavement Management Update #3

Re: Project Update #3
2019 Pavement Management Project

Update of the construction activities to expect this week (April 29) and the following week (May 6):

Phase 1 (see Phasing Plan)

- Reclaiming of existing street pavement is complete in Phase 1.
- The replacement of storm sewer catch basins and manholes are ongoing in multiple locations. It is expected that underground utility replacement to be completed next week.
- Last week and continuing into this week, the contractor has been sub cutting and grading the reclaimed gravel. The contractor started on the east side of the project phase 1 area and is working west.
- The normal next step after the street has been graded is to install fiber conduit in the boulevards and to install concrete curb and driveway aprons. The timing and schedule of this work will depend greatly on the progress of CenterPoint Energy private gas replacement work. Once the city has a better idea of the completion date of CenterPoint Energy's work, the city will notify the neighborhood of future city work. The city is working with CenterPoint Energy to limit any delays and downtime.

Phase 2

- Starting on Wednesday, May 1 (weather dependent), the contractor will start street reconstruction on Phase 2 by reclaiming the existing street pavement into gravel. This work will take multiple days to complete.
- After the streets have been reclaimed, the curb and driveways will be removed.
- The subcontractor in charge of tree removals is scheduled to begin operations on Wednesday, May 1.
- Replacement of storm sewer structures could begin next week on phase 2.

CenterPoint Energy Work

CenterPoint Energy is in the neighborhood to make improvements to their facilities before our construction is completed. Their contractor (Michels) will be working on multiple streets in the neighborhood and will not be following our phased construction schedule. You may see their work start on your street before the city's contractor starts.

**Please look for door hangers on your front door as this is one way city staff will keep you updated on major work and any expected impacts.**

If you have any questions or concerns, please contact city staff.

On behalf of the city of St. Louis Park, we appreciate your continued patience during all phases of construction.
Sincerely,

Aaron Wiesen, P.E.
