RE: 28th Street West – Report to city council study session on August 26, 2019

Dear Resident,

This letter is to inform you that the Engineering department will be presenting a report to city council at the August 26, 2019 study session recommending not to move forward with pedestrian improvements along 28th Street/Jordan Avenue for the foreseeable future due to the high costs and complications of the project.

A project report summarizing the findings can be found at www.stlouispark.org/construction-updates. Please scroll down to “2018 and 2017 project” to find “28th Street Pedestrian Improvements — 2018 Connect the Park project”.

The August 26, 2019 study session report will be available Friday, August 23 at www.stlouispark.org/government/city-council/agendas-minutes. Study sessions are open to the public but are not open for public comment. You can contact council members ahead of the meeting to express your thoughts.

If you have any questions, please call 952.924.2691 or email jsullivan@stlouispark.org.

Sincerely,

Jack Sullivan, P.E.
Senior Engineering Project Manager

c: Mayor and City Council, City Manager

28th Street W. Connection
